### **STATEMENT**

Date: JULY 4, 2018

Our supplier declares that our xanthan gum neither has raw materials that are from animal sources, nor comes into contact with animal or human derived material during manufacturing. The products are not derived from specified risk materials as defined in European Commission Decision EMEA / 410 / 01 Rev.3. Therefore, the products are free from BSE and TSE.

### **Radiation Statement**

<b>Product Name:</b>	XANTHAN GUI	VI
----------------------	-------------	----

We hereby confirm that no radiation was used for our xanthan gum, following information received from our supplier.

### MATERIAL SAFETY DATA SHEET

### 1.0 Chemical Product and Company Identification

**Product name:** XANTHAN GUM **Synonyms:** XANTHAN GUM

Chemical Family: Polysaccharide gum

Date issued: AUG., 2016

### 2.0 Composition/Information on Ingredients

COMPONENT CAS NO: Xanthan Gum 11138-66-2

### 3.0 Hazards Identification

### **Emergency Overview:**

Appearance and Odor: white to cream colored powder

With slight odor

#### **WARNING!**

# COMBUSTIBLE DUST Potential Health Effects

LIKELY ROUTES OF EXPOSURE: Skin contact and inhalation

EYE CONTACT: No more than slightly irritating based on toxicity studies. The dry powder may cause foreign body irritation in some individuals.

SKIN CONTACT: No more than slightly toxic or slightly irritating based on toxicity studies. Prolonged contact with the dry powder may cause drying or chapping of the skin.

INHALATION: Inhalation of the dust may cause coughing and sneezing

INGESTION: Is not toxic if swallowed based on toxicity studies. No significant adverse health effects are expected to develop if only small amounts(less than a mouthful) are swallowed

Refer to Section 11 for toxicological information:

### 4.0 First aid Measures:

IF IN EYES OR SKIN, immediate first aid is not likely to be required. However, this material can be removed with water. Wash heavily contaminated clothing before reuse

IF INHALED, immediate first aid is not likely to be required. However, if symptoms occur, remove to fresh air. Remove material from eyes, skin and clothing.

IF SWALLOWED, immediate first aid is not likely to be required. A physician or Poison Control Center can be contacted for advice. Wash heavily contaminated clothing before reuse.

### 5.0 Fire Fighting Measures:

FLASH POINT: Not applicable

HAZARDOUS PRODUCTS OF COMBUSTION: carbon dioxide, carbon monoxide

EXTINGUISHING MEDIA: In case of fire, use water, dry chemical, CO2, or alcohol foam

UNUSUAL FIRE AND EXPLOSION HAZARDS: This material as normally packaged and handled can contain sufficient fines to form an explosive mixture if dispersed in a sufficient quantity of air. Surfaces that may be covered with this product will become extremely slippery upon application of water.

FIRE FIGHTING EQUIPMENT: Fire fighters and others exposed to products of combustion should wear self-contained breathing apparatus. Equipment should be thoroughly de-contaminated after use.

### 6.0 Accidental Release Measure:

In case of spill, do not blow material. Use vacuum equipment designed specifically for handling combustible dusts.

NOTE- The use of water wash down is not recommended unless the spilled material is already wet. Wet material on a walking surface will be extremely slippery. We spills should be thoroughly flushed with water until non-slippery.

Refer to Section 13 for disposal information and Section 15 for reportable quantity information.

### 7.0 Handing and Storage:

HANDLE IN ACCORDANCE WITH GOOD INDUSTRIAL HYGIENE AND SAFETY PRACTICES.THESE PRACTICES INCLUDE AVOIDING UNNECESSARY EXPOSURE AND REMOVAL OF MATERIAL FROM EYES, SKIN AND CLOTHING.

Keep away from heat, sparks and flame. Avoid creating dust cloud in handling transfer and clean up.

### 8.0 Exposure controls/personal protection:

EYE PROTECTION: This product does not cause significant eye irritation or eye toxicity requiring special protection. Use good industrial practice to avoid eye contact.

SKIN PROTECTION: Although this product does not present a significant skin concern, minimize skin contamination by following good industrial practice. Wearing protective gloves is recommended. Wash hands and contaminated skin thoroughly after handling.

RESPIRATORY PROTECTION: Avoid breathing dust. Use NIOSH/MSHA approved respiratory protection equipment when airborne exposure limits are exceeded(see below). Consult the respirator manufacturer to determine appropriate type equipment for a given application. Observe respirator use limitations specified by NIOSH/MSHA or the manufacturer. Respiratory protection programs must comply with 29 C.F.R.1910,134

VENTILATION: Provide natural or mechanical ventilation to control exposure levels below airborne exposure limits(see below). The use of local mechanical exhaust ventilation is preferred at sources of air contamination such as open process equipment. Consult NFPA Standard 91 for design of exhaust systems.

AIRBORNE EXPOSURE LIMITS: OSHA and ACGIHM have not established specific exposure limits for particulates not otherwise regulated(PNOR) and particulates not otherwise classified(PNOC) respectively, which are the least stringent exposure limits applicable to dusts:

OSHA PER ACGIH TLV
15 mg/m3(total dust)8-hr TWA 10mg/m3(inhalable)8-hr TWA
5mg/m3(respirable)8-hr TWA 3mg/m3(respirable)8-hr TWA

### 9.0 Physical and Chemical Properties

Molecular Weight: approximately 1,000,000

Appearance: Creamy white powder

Odor: Slight

PH: approximately neutral (as a 1% solution)

Bulk Density: approximately 50lb/cu.ft.

Solubility in Water: soluble, forming viscous solutions, becoming a paste at concentrations greater than

about 5%

NOTE: These physical data are typical values based on material tested but many vary from sample to sample. Typical values should not be construed as a guaranteed analysis of any specific lot or as specifications for the product.

### 10.0 Stability and Reactivity

STABILITY: Product is stable under normal conditions of storage and handling. Store in a cool, dry place to maintain product performance.

MATERIALS TO AVOID: strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Thermal decomposition products may include carbon

dioxide and carbon monoxide.

HAZARDOUS POLYMERIZATION: will not occur

### 11.0 Toxicological Information

The dry powder may cause foreign body irritation in some individuals. Prolonged contact with the dry powder may cause drying or chapping of the skin. Excessive inhalation of dust may be annoying and can mechanically impede respiration.

### 12.0 Ecological information

The following data have been classified using the criteria adopted by the European Economic Community (EEC) for aquatic organism toxicity. A legend summarizing the classification scheme appearance below.

48hr.LC50; Daphnia magna: 980mg/L; practically nontoxic 96hr LC50; mysid shrimp, using 2lb./bbl.xanthan gum in a standard drilling mud: >500,000ppm suspended particulate phase.

Legend for Aquatic Organism Toxicity(Journal of the European Communities, Annex VII A, Section 5.2.1)

Values LC50 or EC50 >1.0mg/L LC50 or EC50 >10mg/L Classifications Toxic Harmful

LC50 or EC50 >100mg/L Practically Nontoxic BOD5 is approximately 200mg O2/gram.COD is approximately 1600mg O2/g.

### 13.0 Disposal Considerations

Dispose of in accordance with local, state and federal regulations. Dry or wet solid material can be landfilled in accordance with local, state and federal regulations. Liquids may be sewered in accordance with local, state and federal regulations if care is taken to avoid pluggage or blockage of sewer systems recognizing that these materials are intended to increase viscosity and form gels. As a carbohydrate, this material should be readily biodegradable.

### 14.0 Transport Information

This product is not hazardous under the applicable DOT, ICAO/IATA, or IMDG regulations

Pls apply the appropriate regulations to properly classify your shipment for transportation.

### 15.0 Regulatory Information

The ingredients of this product are on the TSCA Chemical Substances Inventory, the Canadian Domestic Substances List, and are included in the European Inventory of Existing Commercial Chemical Substances(EINECS)

### SARA HAZARD NOTIFICATION

Hazard Categories Under Title III Rules (40 CFR 370):not applicable Section 302 Extremely Hazardous Substances: not applicable Section 313 Toxic Chemical(s): not applicable

CERCLA REPORTABLE QUANTITY: not applicable

### 16.0 Other Information

Health Fire Reactivity
NFPA Rating: 0 1 0
HMIS Rating: 0 1 0

### Statement

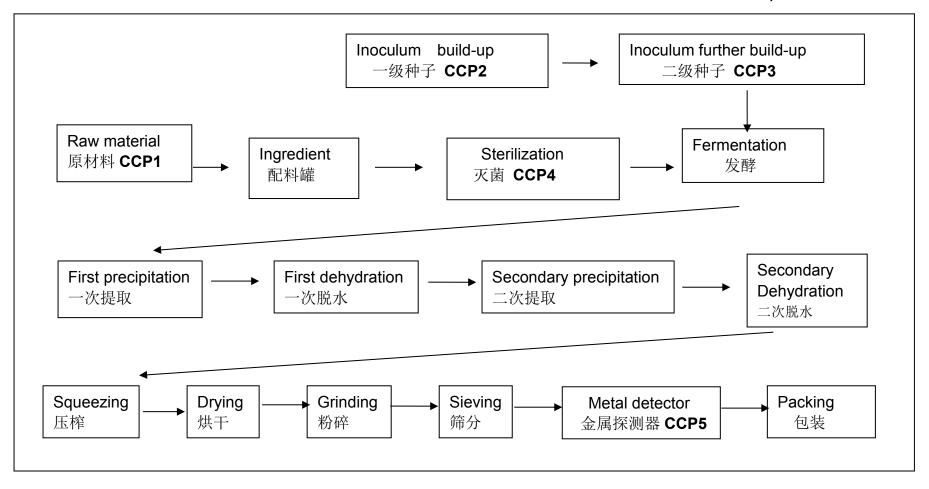

We hereby state the country of origin as China.

2018-07-04

### **Production Flow Chart and CCP**

8t h Dec, 2023

### Material Safety Data Sheet

### SECTION I - PRODUCT IDENTIFICATION

Product Name: Xanthan!Gum

End Use: Food Additive

Description: White-like Powder

Chemical Name: Xanthan Gum

Chemical Family or Formula: Polysaccharide Gum

HMIS Rating: Health 0 Flammability 1 Reactivity 0

### **SECTION II – INGREDIENTS**

Components: Xanthan Gum

CAS # 11138-66-2

### **SECTION III - CHEMICAL AND PHYSICAL PROPERTIES**

Appearance: White-like powder Odor: Slight

Boiling Point: Not Applicable Specific Gravity (H<sub>2</sub>O=1): Not Applicable

Melting Point: Not Applicable Vapor Pressure (mm Hg): Not Applicable

Evap. Rate (Butyl Acetate=1): Not

Vapor Density (Air=1): Not Applicable

Applicable

pH: @ 1.0 %: 6.0-8.0 Solubility in Water: Complete

Stable: Yes

Flash Point: Not Applicable

Extinguishing Agents: Dry chemical, CO<sub>2</sub>, Foam

Fire and Explosion Hazards: Carbon oxides formed when burned.

Special Fire Fighting Procedure Wear self-contained breathing apparatus and

s: protective equipment when entering area of fire

involving this material.

### SECTION V - HEALTH HAZARD DATA

No

Route(s) of Entry:

Skin

Eye Yes

Inhalation Yes

Ingestion Yes

Nature of Principle Hazard: Not a health hazard as defined by OSHA.

Effects of Overexposure: Prolonged contact with the dry powder may cause

drying of the skin. Non-toxic through ingestion and dermal absorption.

**Emergency First Aid Procedures:** 

Ingestion: May result in the material swelling in the throat. Drink large amounts

of water. Never give anything by mouth to an unconscious person.

Eyes: Flush with plenty of water. If irritation develops, call a physician.

Skin Contact: No harmful effects expected. Wash with water. Get medical

attention if irritation develops.

Inhalation: If large quantities have been inhaled, keep airway open as

necessary.

If swallowed: Symptomatic treatment. No harmful effects are expected

### **SECTION VI - PERSONAL PROTECTION INFORMATION**

Respiratory Protection: In heavy product dust exposure a protecting mask is recommended.

Ventilation Type Required: Local exhaust

Other: Treat as a nuisance dust.

Protective Gloves: Not normally required Eye Protection: Not normally required

Other Protective Clothing or Equipment: None

## SECTION VII - PRECAUTIONS FOR SAFE HANDLING OF SPILLS OR LEAKS

Steps to Be Taken in Case Material is Released or Spilled:

Sweep up spilled material and repackage. Avoid creating dust clouds; hose spill area thoroughly with water. Use caution, as the product is extremely slippery when wet.

Waste Disposal Method (Insure Conformity with all Applicable Disposal Regulations):

Incinerate or place in permitted waste management facility.

Precautions to Be Taken in Handling and Storing:

Store in cool, dry place. Keep dry. May contribute to slickness of surface when wet.

Other Procedures: None

#### **SECTION VIII - REACTIVITY DATA**

Stability: Stable

Incompatibility: Strong oxidants

Hazardous polymerization: Will not occur

Hazardous decomposition Prod Carbon dioxide and carbon monoxide formed when

ucts: burned.

Conditions to avoid: Not Applicable

#### SECTION IX – TRANSPORTATION INFORMATION

Shipping Name: FUFENG Xanthan Gum

Hazard Class: Not Regulated

ID Number: None

Label(s) Required: None

Shipping Description: Not Regulated Packaging References: Not Regulated

Special Transportation Notes: None

### **SPECIFICATION**

### **Xanthan Gum**

DESCRIPTION
Appearance
White-like or light-yellow powder

Appearance !

Store in ventilated, clean, dry and cool places, and cannot be stored!

Storage with poisonous, harmful and corrosive substances

24 Months

Shelf life China

Country of origin! Xanthan gum is a kind of hydrophilic biological polysaccharide which is!

Description made from corn starch after the process of fermentation with!

Xanthomonas Campestais, extraction, drying and grinding. Benefited by!

its superior thickening and stabilising effect, shear resistance and!

unique pseudo-plasticity rheological property

Xanthan gum is widely used in food, pharmaceutical, fine chemical, oil!

drilling and other fields

Not less than 99% through 60 mesh

Not less than 95% through 80 mesh

China

Country of origin

Applications!

**SPECIFICATIONS** 

Particle size (mesh)

Viscosity 1200 - 1700 cp, 1% KCL

Ethanol Max 500 ppm, mg/kg Lead Max 2 ppm, mg/kg

Whiteness Min 50

Soluble in water, insoluble in ethanol

Shearing Ratio Min 6.5

**MICROBIOLOGICAL**

Xanthomonas Campestris Viable cells absent in 1g

### **STATEMENT**

### **NON IRRADIATION / NON IONIZED/RADIOLOGICAL**

According to the supplier, this product is non-irradiated, non-ionized and doesn't contain any radiological contamination.

### **GMO STATEMENT**

According to the supplier, this product does not contain any genetically modified ingredients or processing aids.

### **BSE/TSE Statement**

According to the supplier, this product does not contain BSE or TSE.

DIETARY	Suitable
Vegetarian	YES
Vegans	YES
Orthodox Jewish Diet (Kosher Certified)	YES
Muslim Diet (Halal Certified)	YES

### Vegan Statement

We hereby confirm that our Xanthan gum is suitable for vegan and vegetarian completely.

### Sterilization statement

Product Name: XANTHAN GUM

Our supplier confirms that they use high pressure and high temp. for sterilization during xanthan gum production process.

### **Manufacturer's Certificate**

We herewith confirm that the Xanthan Gum which we supply to you, and that the raw materials and all other ingredients used for the production of Xanthan Gum are not produced by means of genetic engineering and no genetically modified materials are used in process. Following procedure are on site to guarantee our products GMO-Free and conform with EU 1829/2003 and 1830/2003.

#### 1. Raw material control:

Xanthan Gum raw materials that are set forth below are only used to produce Xanthan Gum in our company. Raw material suppliers are pre-qualified to be capable of supplying GMO-Free, safe and qualified raw materials. We solely use their GMO-Free raw materials from named suppliers as following:

Raw material: Maize Starch, Soybean, Alcohol, Sodium Chloride, Calcium Carbonate, Sodium Hydroxide

### 2. PCR tests & batch traceability system:

PCR tests is applied for release of raw material to guarantee GMO-Free. Furthermore, we established completed batch trace final product to raw material batch as support to identify every batch of our products are GMO-Free.

3. Good manufacturing Practice monitor our processing to assure no Genetic Modified contamination.

In brief, no raw material/adjuvant (e.g. maize, soybean products) that are genetic modified are existed/included in the manufacturing of our Xanthan Gum.

Furthermore, no contamination of genetic materials or methods in the processing, storage and transportation of our Xanthan Gum.
